

Clothing Swap:

Make money and clean out your closet!

Project Description:

One day as I was going through my closet I realized that I have a lot of clothes that I don't ever wear! I found a Facebook page that does something similar but is very disorganized.

Basically, the idea is that we want to create a simple way for people to snap a quick picture of their unwanted clothing and sell it on our web app. Similar idea to the Facebook page except it is a lot more organized.

Team:

Robbie and I would be open to one or two additional teammates.

SQL:

Postgres

No-SQL:

MongoDB

Business:

The business will most likely be subscription based or we will take a small chunk out of each transaction.

Legal:

Utah LLC

Technical:

- We are going to focus on a very user friendly, organized website.
